Sorry for the delay in this reply. As we discussed, the bathymetry surveys are in many formats, some of which are prohibitively large electronic files.

On ourPassaic.org, under “Digital Library”, “Passaic River/Newark Bay Datasets” (last page), are posted the 2010, 2011 and 2012 bathymetry surveys. The 2011 survey is processed to a 5ft by 5ft grid and the other 2 are processed to 3ft by 3ft grids. Please let me know if these meet your needs.

Thank you for your prompt reply. Is it possible for us to get bathymetric data for the Passaic river?

Thank you for your interest and questions last Thursday! I’m afraid I have other meetings scheduled this Thursday, so will not be able to attend another ANJEC meeting this Thurs.

Dear Ms. Yeh,

Thank you for your presentation last Thursday. Would you kindly send us a copy so that I could share with my colleagues? Also, there is another meeting this Thursday in Newark. Are you planning to attend?

Thanks

Jay N. Meegoda
